

Innovative Fleet Management Solutions

Titan Aviation Holdings, a wholly-owned subsidiary of Atlas Air Worldwide Holdings, Inc., is a freighter-centric leasing company with one of the world’s leading fleets of Boeing 777 Freighters.

Our deep domain expertise and innovative aviation solutions help customers manage capital outlays efficiently by enabling them to lease freighter or passenger aircraft without risking exposure to fluctuations in the value of owned aircraft.

Reflecting our extensive knowledge of the aircraft market—especially the freighter segment—and our access to capital markets, Titan is proud to empower our customers to drive efficiency and growth of their aviation operations.

Only Titan, in partnership with its sister company Atlas Air, offers a unique integrated solution of dry and wet leases. The ability to offer an operating solution along with a financing solution unlocks value for our customers by allowing them to quickly tailor their fleet to take advantage of market opportunities.

In addition to a comprehensive freighter dry-leasing solution that includes our industry-leading expertise and freighter-related value-added services, Titan also provides unique passenger aircraft assistance.

Our fleet consists of Boeing 777, 767, 757 and 737 Freighters, as well as 737 passenger aircraft on lease to airline, express package, general cargo and e-commerce customers in North America, Europe, Asia, and the Middle East, with additional types under consideration.

Titan can help you find innovative solutions in fleet planning. Our services include:

Strategic Investments

Investments in new technology platforms, such as the 777-200LRF freighter that creates superior value for our customers.

Innovative Fleet-Planning Solutions

Our leasing experts can help you plan acquisition and financing of freighter and passenger aircraft.

Freighter Aircraft Conversion Management

Titan offers total lifecycle management, including feedstock procurement and project technical oversight.

Asset Management Services

Deal origination, lease management, re-marketing, asset-type exit strategy planning and participation.
