

Expand Your Reach

Atlas Air's scale, flexibility, and efficiency enables customers to drive their operations without the high capital costs and exposure of aircraft ownership. Global airlines, express operators, shippers, and freight forwarders rely on the advantages of our high-quality and individually tailored ACMI services to profitably expand their existing fleet and cargo network.

Atlas Air is a global leader in providing aircraft outsourcing services to customers on an ACMI (Aircraft, Crew, Maintenance, and Insurance) basis. ACMI empowers customers to flexibly meet demand and capitalize on market opportunities with dedicated aircraft.

Atlas Air develops and delivers integrated services, adding incremental value to our customers' businesses. ACMI allows for flexible network solutions and reductions in overall unit operating costs increasing global presence by working closely with our customers to understand their strategies and requirements.

Technologically Advanced Aircraft

Offer greater capacity through our Boeing Freighter fleet of 747-8Fs, 747-400Fs, 777s, 767s, and 737s—the most versatile and technologically advanced aircraft. In fact, Atlas Air is the only ACMI operator to offer the 747-8F on an ACMI basis.

Unmatched Global Footprint

Atlas Air can operate the most complete networks covering the most difficult locations.

Generally we operate to:

- 400 airports
- 100 countries

Quality Operational Performance Delivery

Atlas Air delivers on-time performance for our customers. With the demands of express operators, Military, and passenger operations, Atlas Air has implemented a reliability tracking process to ensure high-quality standards are met and maintained. Every flight operation is critically managed by our state-of-the-art 24/7/365 Global Control Center (GCC).

MULTIPLE AIRCRAFT PLATFORMS

Atlas Air can supply the 747 freighter to meet your ACMI needs.

B747-8F*

We are the only ACMI operator to offer the Boeing 747-8 Freighter.

- 16% more payload capacity
- 7 additional pallet positions
- Double-digit fuel burn improvement
- Fewer CO² emissions
- Significant unit cost savings
- Nose-door loading

B747-400F

• Known as "the workhorse of the industry"

- The leader for operating performance in the inter-continental air-freighter market due to its low cost per ton-mile and large cargo capacity
- Nose-door loading capability makes turnarounds faster and enables the carriage of large and outsize pieces—critical for the oil & gas industry and project cargo

*Compared with market-leading performance of the Boeing 747-400, according to Boeing.
