

# World's Leading Freighter Aircraft Lessor

Titan Aviation Holdings, a wholly-owned subsidiary of Atlas Air Worldwide Holdings, Inc., is a freighter-centric leasing company focused on the acquisition, sale, dry leasing, purchase leaseback and marketing of commercial aircraft and related equipment.

With an aircraft portfolio of over US \$1 billion, Titan is among the top global aircraft leasing companies by asset value. Our deep domain expertise and innovative aviation solutions help customers manage capital outlays efficiently by enabling them to lease freighter aircraft without risking exposure to fluctuations in the value of owned aircraft.

Reflecting our extensive knowledge of the aircraft market—especially the freighter segment—and our access to capital markets, Titan is proud to empower our customers to drive efficiency and growth of their aviation operations.

Titan, in partnership with Atlas Air, offers a unique integrated solution of dry and wet leases. The ability to offer an operating solution along with a financing solution unlocks value for our customers by allowing them to tailor their fleet to take advantage of market opportunities.

Our fleet of cargo and passenger aircraft operate worldwide, with customers ranging from international flag carriers, express operators, e-commerce providers, postal services enterprises and regional carriers.

Our services include:

## Fleet Solutions

With our large, available and growing fleet of narrow, medium and wide body freighters, we can support our customers in expanding their fleet capacity, fleet renewal requirements and even provide them with interim capacity whenever required.

## Financing Solutions

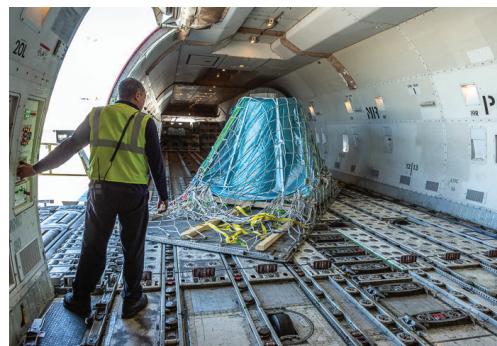

We offer aircraft operating leases and purchase leasebacks, providing airlines with the flexibility and ability to focus on their core business, freeing up their equity for other business needs.

## Asset Management Services

From sourcing, investment analysis, technical management, lease administration to exit strategy, Titan has the ability to manage our customers' assets through their operational lives.

## Freighter Aircraft Conversion Management

Our experts in Titan have extensive experiences in managing and executing P to F conversions. This includes feedstock procurement and project technical oversight.
