Safe Harbor Statement

This presentation contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 that reflect Atlas Air Worldwide Holdings, Inc.’s (AAWW) current views with respect to certain current and future events and financial performance. Such forward-looking statements are and will be, as the case may be, subject to many risks, uncertainties and factors relating to the operations and business environments of AAWW and its subsidiaries that may cause actual results to be materially different from any future results, express or implied, in such forward-looking statements.

For additional information, we refer you to the risk factors set forth in the documents filed by AAWW with the Securities and Exchange Commission. Other factors and assumptions not identified above are also involved in the preparation of forward-looking statements, and the failure of such other factors and assumptions to be realized may also cause actual results to differ materially from those discussed.

AAWW assumes no obligation to update the statements in this presentation to reflect actual results, changes in assumptions, or changes in other factors affecting such estimates, other than as required by law.

This presentation also includes some non-GAAP financial measures. You can find our presentations on the most directly comparable GAAP financial measures calculated in accordance with accounting principles generally accepted in the United States and our reconciliations in the appendix and our earnings releases dated February 19, 2019, which are posted on our website at www.atlasairworldwide.com.

Delivering a Strong Value Proposition

Traditional Airfreight

- **Growing ~4%** through 2035
- Airfreight: **35% of the value** of world trade
- Airlines seeking **more efficient and flexible** freighter solutions

Express

- Strong growth with **~7.3% CAGR**
- Segment fueled by **strong e-Commerce growth**
- Express carriers require **incremental and flexible asset solutions**

e-Commerce

Tailoring Airfreight Networks for e-Commerce

Customers require tailored solutions, and Atlas provides:

- Customized air networks supported by an unparalleled range of freighters
- Global scale to operate domestic, regional and international networks

We match each customer with the **right assets**, the **most efficient networks** and **value-adding solutions**

Demand Exceeding Current Orders

- **Current Orders**
- **New Large Freighters Needed**
(at ~4% growth)

980 new production
freighters needed over
next 19 years (2018 – 2037)

Large Freighter Supply Trends

- Fleet expected to grow <1% annually; forecast long-term demand growth of ~4%
- Older technology is nearly gone
- MD-11F and 747-400 converted freighter fleets are shrinking
- Large wide-body freighters will continue to dominate the major trade lanes
- Belly capacity cannot displace freighters

Main Deck to Belly?

Key Considerations

- 10% shift of Trans-Pac market from main deck to Pax belly requires 50 incremental aircraft
- Limitations on slot and route availability; not enough passenger demand; limited access to aircraft
- Global average capacity availability on a 777-300ER is 18-20 tonnes*
- New Pax 787s fly point-to-point, e.g. London to Phoenix; good for passengers, not cargo

Percentage of World RTKs Carried on Freighters

Dedicated freighters will continue to carry more than half of air cargo traffic
